## TESTING CHALLENGES AND REQUIREMENTS FOR ADVANCED INDUSTRIAL SENSOR SOLUTIONS

Ivan Ivanov

FESTO Production EOOD, Bulgaria

FESTO Production EOOD plans, develops and manufactures complete testing work places, production lines with transfer systems, EOL-test stations and even laboratory test devices with different tests, exactly matching to its individual requirements and expectations.

An extensive, prior consultation and the integration of R&D department in the entire process of development customized system, lead to a tailor-made solution regarding software and hardware, as mechanic and adaption solutions. No matter if special test object stations or individually constructed contacting are required, we develop and manufacture our ready-to-use system from planning to delivery!

For this, FESTO Production EOOD uses the latest technologies, controlled project management and manpower, mainly from TU SOFIA.
